DETAILED ACTION

Allowable Subject Matter

Claims 11, 13-18 and 20-30 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. A computer-readable medium having stored thereon a computer program for converting characters of a first type into at least one character of a second type, said program when executed enables a user interface which that displays a plurality of characters of the first type; and provides an indicator indicating which of the plurality of characters of the first type are to be associated together into segment; and enables a user to manipulate the indicator to designate two or more of the displayed characters of the first type to be associated into the segment, a segmentation module that associates the characters into the segment based on the designation by the user via the user interface; and a character conversion module that converts the characters of the segment into at least one character of the second type. These features are not found or suggested in the prior art.

The closest prior arts, Murphy and Shulman discloses a conventional user interface for character entry wherein limited numbers of alphanumeric characters and symbols are displayed on the screen at a given time; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
